Dear Mr Bechely

Enclosed is a copy of a report regarding a recent inspection of the presently closed Waukegan No 2 - Adelphi Landfill Site

It appears that the site is in violation of post-operation rules and regulations established by your Agency Therefore, this matter has been turned over to you for further action

If we can be of any assistance in this matter, please feel free to contact us at any time

Very truly yours,

James T Ambroso

MEMORANDUM

September 5, 1980

TO File

FROM James T Ambroso
Solid Waste Specialist

Re Closed Waukegan #2-Adelphi Site

On Thursday September 4 1980 I drove to the presently closed Waukegan # 2 landfill site located north of Sunset Road and east of Adelphi Avenue in Waukegan, to become familiar with post-operating conditions there

I briefly inspected the site and found the area to be in fairly good shape except for a leachate puddle that has developed on the southeast corner of the fill area. The puddle is roughly 12' long, 3' wide, and approximately 2' deep. A strong odor emanated from the leachate material. The rest of the site has grown over with vegetation.

I feel that the leachate problem should be dealt with immediately as the drainage in this portion of the site flows into a small housing development to the east. There was also a high concentration of insects in this area more than likely due to the presence of the leachate.
